

Here is the second set of 10 questions to complete a full 20-question practice cycle. These focus on logic, counting strategies, and the multi-step word problems common in the Noetic Learning Math Contest.

Suggested Time Limit: 23 Minutes (to complete the 45-minute total).

Noetic Math Practice: Set 2 (Questions 11–20)

1. Sticker Swap: Leo has 30 stickers. He gives 5 to his brother and 5 to his sister. How many stickers does Leo have now?
2. Making Numbers: How many different 2-digit numbers can you make using only the digits 4 and 7? (You are allowed to repeat digits).
3. Skip Counting: What is the next number in this skip-counting pattern?
5, 12, 19, 26, __\
4. Scale Balance: A balance scale is level. On the left is one 100g weight. On the right are two identical toy cars. How much does each toy car weigh?
5. Pizza Slices: A pizza is cut into 8 equal slices. Sarah eats 2 slices and Tom eats 3 slices. How many slices are left in the box?
6. Pet Survey: In a class of 20 students, 12 students have cats and 10 students have dogs. If every student has at least one of these pets, how many students have both a cat and a dog?
7. The Big Race: Anna finished the race before Ben. Ben finished the race before Cody. Who came in last place?
8. Standing in Line: Kevin is standing in a line of students. He is 5th in line from the front and also 5th in line from the back. How many students are in the line altogether?
9. Digit Sums: I am a 2-digit number. The sum of my digits is 5. If my tens-place digit is 4, what number am I?
10. The Hidden Digit (Medium): The same digit is hidden under the eraser in this correctly solved addition problem. What is the hidden digit?

$$\begin{array}{r} [\]6 \\ + 4[\] \\ \hline 90 \\ \hline \end{array}$$
